 <br> <br> Session 8 - FRQ (No Calculator)}

| $x$ | $a(x)$ | $a^{\prime}(x)$ |
| :---: | :---: | :---: |
| -4 | 12 | -2 |
| -3 | 9 | -1 |
| -2 | 6 | 0 |
| -1 | 3 | -3 |
| 0 | 2 | -1 |
| 1 | -2 | -4 |

Let $a$ be a differentiable function. The table gives values of $a$ and its derivative $a^{\prime}$ at selected values of $x$.

Let $b$ be the function whose graph, consisting of four line segments, is shown.
a. Let $P$ be the function defined by $P(x)=a(x) \cdot b(x)$. Find $P^{\prime}(-3)$.
b. Let $C$ be the function defined by $C(x)=5 b(a(x))$. Find $C^{\prime}(-1)$.
c. Let $V(x)$ be the function defined by $V(x)=a^{-1}(x)$. Find $V^{\prime}(-2)$.
d. Find the value of $\lim _{x \rightarrow 1} \frac{-5+\int_{0}^{x} b(t) d t}{x^{2}+\cos (\pi x)}$. Show the work that leads to your answer.
